Abstracts

The global Pre-Filled Syringe market size is expected to reach \$ 5844 million by 2032, rising at a market growth of 2.5% CAGR during the forecast period (2026-2032).

Prefilled syringes, also known as prefilled syringes, prefill syringes, prefillable syringes, or PFS, integrate drug storage and injection functions. This practical and novel injectable dosage form is primarily used for vaccines and non-terminally sterilized biological agents.

Upstream suppliers mainly include borosilicate glass or polymer materials, rubber stoppers, needle caps, stainless steel, coated silicone oil, packaging materials, and mold equipment suppliers; downstream suppliers primarily serve vaccine, biopharmaceutical, insulin, and medical aesthetic formulation companies, as well as hospitals, clinics, pharmacies, and home self-administration terminals. The global prefilled syringe market has a unit price of \$823 per thousand units, with annual sales of approximately 5708 million units.

The global prefilled syringe market will continue to develop towards higher-end, safer, and more biocompatible products. On the one hand, with the increasing demand for biopharmaceuticals, vaccines, GLP-1 drugs, and self-administration for chronic diseases, the advantages of pre-filled syringes in improving drug administration convenience, dosage accuracy, and patient compliance will become more prominent. On the other hand, the industry is accelerating its upgrade towards polymer materials, low silicone oil, low residue, dual-chamber/special function designs, and compatibility with automated injection pens and wearable drug delivery devices. Simultaneously, stricter regulatory requirements for drug-device combination products will drive companies to continuously strengthen their capabilities in aseptic filling, material

compatibility, sealing integrity, and supply chain stability. Market competition will gradually shift from single packaging material supply to comprehensive capabilities encompassing 'materials + design + filling adaptation + regulatory services.'
