Abstracts

Conduit is defined as a rigid or flexible metal or nonmetallic raceway through which cables can be pulled. Metal conduit, which typically comes in 10-foot lengths, is fairly rigid and requires special tooling and accessories to join it. Nonmetallic conduit is available on reels in longer, continuous lengths that do not have to be joined as often. Prewire is to install a wiring system in advance of it being used or needed.

Scope of the Report:

This report focuses on the Pre-wired Conduits in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Pre-wired Conduits offers an all-in-one solution for electrical installations, with the wires already running through it. Pre-wired conduit systems are used for cable management. They are typically used to distribute power, lighting, data and communications in buildings with concrete floors, steel framed cavity floors and suspended ceilings. For present, Germany, France and UK are leading the Europe pre-wired conduits consumption market, however, other regions like Italy and Russia are also seeing a rising sales trend.
