Precast concrete lintels/sills are factory-fabricated concrete elements used as structural support above doors and windows (lintels) or at the bottom of windows (sills) in buildings. The lintel carries the wall loads above, ensuring the structural stability of the door and window openings, while the sill provides a strong, durable surface that resists water infiltration and supports the installation of the window frame. Precast concrete lintels/sills are widely used in modern buildings due to their precise dimensions and easy installation.
