According to our (Global Info Research) latest study, the global Precious Metals Unallocated Storage market size was valued at US\$ 1469 million in 2025 and is forecast to a readjusted size of US\$ 2044 million by 2032 with a CAGR of 4.8% during review period.

Precious Metals Unallocated Storage is a regulated, transaction-focused custodial service for physical precious metals (gold, silver, platinum, palladium, and other platinum group metals/PGMs), defined by the London Bullion Market Association (LBMA) and London Platinum & Palladium Market (LPPM) as a creditor-debtor arrangement between a client and a licensed custodian (typically an LBMA-member bank, bullion dealer, or trading house).

Unlike Allocated Storage (where the client holds full, exclusive legal title to specific, individually identifiable physical assets via bailment law), Unallocated Storage does not assign ownership of unique, segregated physical metal to the client. Instead, the client holds a general, unsecured contractual claim against the custodian for the delivery of an equivalent quantity and purity of the specified precious metal on demand, rather than title to any specific bars, coins, or physical inventory.
