The global Precipitated Barium Sulfate market size is expected to reach \$ 639 million by 2032, rising at a market growth of 2.6% CAGR during the forecast period (2026-2032).

Precipitated barium Sulfate is a type of functional filler and it is superfine with a low oil absorption threshold, allowing for insulation and the prevention of agglomeration and flocculation, ultimately providing the benefit of improved pigmentation efficiency. It is widely used for a variety of coatings, modified plastics, rubber, elastomers, paper, cosmetics fillers. It can also be used as the battery cathode expansion rod, the glaze materials to manufacture ceramic and enamel, the surface coating agent of printing paper and coated paper, the sizing agent used in textile industry, the clarifying agent for glass, and it can play part of defoaming and increasing the gloss effect. As an anti-radiation protective wall material, it can be used in nuclear facilities, atomic power plants and X-ray laboratories, etc. to provide a good shielding effect. With the X-ray developing feature, it can be used in the medical developing fiber and the children's toys. For drains, speakers and audio, it can effectively cut off the noise. It can also be used in the synthesis of pharmaceutical chemicals, and the flavors and pigments industry.

Global Precipitated Barium Sulfate key players include Cimbar, Huntsman, Solvay, Barium & Chemicals, Jiaxin Chem, etc. Global top five manufacturers hold a share over 45%.

China is the largest market, with a share over 65%, followed by The United States and Europe, both have a share over 20% percent. In terms of product, Ordinary Precipitated Barium Sulfate is the largest segment, with a share over 65%. And in terms of application, the largest application is Coating Industry, followed by Plastic Industry.
