Abstracts

The global Precipitated Silicas market size is expected to reach \$ 6701 million by 2032, rising at a market growth of 4.6% CAGR during the forecast period (2026-2032).

Precipitated silica, a form of synthetic amorphous silicon dioxide, is derived from quartz sand, a crystalline form of silicon dioxide. The physical properties of precipitated silica can be manipulated during the manufacturing process to deliver products with a wide range of performance-enhancing features engineered for many different end-use applications.

The precipitated silicas industry concentration is low, and the manufacturing bases are distributed all over the world. Currently the major producers are mainly distributed in the United States, EU, Japan and China. China is the largest producer and consumer, but the outputs are the low-end products, the high-end products are produced by the giants like Evonik, Rhodia (Solvay), Huber Engineered Materials, PPG, OSC Group, WR Grace and Tosoh Silica etc., which established the factories all over the world, through acquisitions or wholly foreign-owned and joint ventures. The top 2 company are Evonik and Rhodia-Solvay, with 35% market shares.

China is the largest consumption place, with a consumption market share nearly 37%. Following China, Europe is the second largest consumption place with the consumption market share of 20%.

This report studies the global Precipitated Silicas production, demand, key manufacturers, and key regions.
