## **Abstracts**

According to our (Global Info Research) latest study, the global Precipitated Silicas market size was valued at US\$ 4712 million in 2024 and is forecast to a readjusted size of USD 6429 million by 2031 with a CAGR of 4.6% during review period.

Precipitated silica, a form of synthetic amorphous silicon dioxide, is derived from quartz sand, a crystalline form of silicon dioxide. The physical properties of precipitated silica can be manipulated during the manufacturing process to deliver products with a wide range of performance-enhancing features engineered for many different end-use applications.

The precipitated silicas industry concentration is low, and the manufacturing bases are distributed all over the world. Currently the major producers are mainly distributed in the United States, EU, Japan and China. China is the largest producer and consumer, but the outputs are the low-end products, the high-end products are produced by the giants like Evonik, Rhodia (Solvay), Huber Engineered Materials, PPG, OSC Group, WR Grace and Tosoh Silica etc., which established the factories all over the world, through acquisitions or wholly foreign-owned and joint ventures. The top 2 company are Evonik and Rhodia-Solvay, with 35% market shares.

China is the largest consumption place, with a consumption market share nearly 37%. Following China, Europe is the second largest consumption place with the consumption market share of 20%.
