## Abstracts

The global Prefabricated Bathroom Pods market size is expected to reach \$ 4045.4 million by 2029, rising at a market growth of 7.3% CAGR during the forecast period (2023-2029).

Global core prefabricated bathroom pods manufacturers include Walker Modular, Part Construction AB, Offsite Solutions, Bathsystem and Deba. The top 3 companies hold a share about 10%. Europe is the largest market, with a share about 50%, followed by North America and China with the share about 15% and 12%. In terms of product, steel type is the largest segment, with a share about 40%. And in terms of application, the largest application is hospitality, followed by student housing.

Prefabricated bathroom pods are fully functional bathrooms; the key difference being that they are designed and built offsite, rather than on a traditional building site as part of a construction project. Useful for commercial applications, bathroom pods are built in an offsite factory as a completed unit and are then fully tested and fitted with all of the required fixtures and fittings such as taps, rails, mirrors, and appliances. The pods are then simply delivered to the site for installation, where they are connected to the plumbing and electrical services.
