Prefabricated curb is a kind of curb made of concrete, stone or other durable materials in advance in the factory. It is transported to the construction site for installation after being formed by molds. Prefabricated curb is usually used in areas such as roads, parking lots, gardens and landscape design as a boundary separator of roads or other areas. Compared with traditional cast-in-place concrete curb, prefabricated curb has the advantages of quick installation, short construction period and high quality consistency. It can effectively divide lanes, sidewalks and green belts, and improve the cleanliness and safety of roads.
