## Abstracts

A prefabricated shower room can provide homeowners with a complete shower instead of the classic and painstaking method of building a tiled shower from scratch. A 'prefabricated' shower means that the manufacture of the shower enclosure has been done outside the factory and only the assembly is done where you need it. In addition to diverting most of the trash to a location other than your home, this method means the shower can be done in a few hours instead of days for a custom tiled shower unit.
