Prefillable COP polymer syringes are high-performance syringes made from cyclic olefin polymer (COP) and specifically designed for prefilled medications. Compared to traditional glass syringes, COP syringes offer excellent transparency, chemical resistance, and high breakage resistance while eliminating the risk of glass particle contamination. Their lightweight design and superior sealing capabilities make them ideal for packaging sensitive pharmaceuticals such as biologics, vaccines, oncology drugs, and other high-sensitivity medications. Additionally, COP syringes reduce drug adsorption, ensuring drug stability, and are suitable for both lyophilized and liquid formulations. Due to their outstanding performance, COP prefillable polymer syringes are widely used in advanced medical and biopharmaceutical applications.
