Abstracts

According to our (Global Info Research) latest study, the global Preformed Fittings for OPGW market size was valued at US$ 221 million in 2025 and is forecast to a readjusted size of US$ 341 million by 2032 with a CAGR of 6.7% during review period.

Preformed fittings for OPGW are helically formed overhead-line hardware used for anchoring, suspending, protecting, repairing, vibration control and grounding of Optical Ground Wire. Major products include preformed dead-end fittings, preformed suspension fittings, armor rods, repair rods, spiral vibration dampers and grounding accessories. By wrapping around the OPGW over a long contact length, they distribute gripping stress, reduce localized crushing, protect the optical unit and metal tube, and improve fatigue resistance. Key upstream materials include aluminum-clad steel wire, galvanized steel wire, aluminum-alloy wire, stainless steel, ductile iron, elastomeric inserts, zinc-aluminum anti-corrosion coatings and fasteners. Downstream applications include HV, EHV and UHV transmission communication, relay protection, grid dispatching, substation interconnection and renewable-energy export lines.

In 2025, global preformed fittings for OPGW production reached approximately 3 million units, with an average global market price is $70 per unit.
