Abstracts

The global Premium IOLs market size is expected to reach \$ 499.1 million by 2029, rising at a market growth of 6.6% CAGR during the forecast period (2023-2029).

Aging Population: The global population is aging, leading to an increasing prevalence of cataracts and age-related vision problems. As people seek to maintain an active lifestyle and good vision, premium IOLs become an attractive option for addressing cataracts and presbyopia simultaneously.

Desire for Enhanced Visual Outcomes: Patients are increasingly seeking not just clear vision but also improved overall visual quality. Premium IOLs offer the potential for reduced glare, improved contrast sensitivity, and better night vision compared to traditional monofocal IOLs.

Technological Advancements: Ongoing advancements in lens design, materials, and manufacturing techniques have led to the development of premium IOLs with better optical performance. These technological improvements make premium IOLs a more appealing option for both patients and surgeons.
