The global Prenol (3-Methyl-2-buten-1-ol) market size is expected to reach \$ 88.53 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Prenol (3-Methyl-2-buten-1-ol) is a colorless, transparent liquid with a strong ester odor. This organic compound is a flammable liquid containing double bonds and hydroxyl groups in its molecule. It is commonly used in the synthesis of vitamin E, vitamin A, citral, and highly effective, low-toxicity pyrethroid insecticides, and is an important raw material in fine chemical production.

Upstream production mainly relies on basic petrochemical raw materials. The core pathway is the condensation reaction of isobutylene and formaldehyde, or preparation via the chlorination and hydrolysis of isoprene.

Global sales in 2025 were approximately 11,400 tons, with an average selling price of US\$5,607 per ton. The industry's gross profit margin is around 20%-30%.

3-Methyl-2-buten-1-ol, commonly known as isopentenol or prenol, is one of the simplest terpene alcohols and a crucial fine chemical intermediate, and its global market is showing steady growth. Firstly, in the pharmaceutical field, isopentenol is a key raw material for the synthesis of vitamin A, vitamin E, and other complex drug intermediates. Global annual pharmaceutical R&D spending of hundreds of billions of dollars and the continued demand for drugs to treat chronic diseases provide a stable and strong foundation for the market's growth. Secondly, in the pesticide field, with the increasing demand for highly effective and low-toxicity pesticides, the application of isopentenol in the synthesis of pyrethroid insecticides and other products is expanding. Furthermore, its unique fruity aroma also gives it a place in the fragrance and flavor industry, used in

the formulation of high-end perfumes and personal care products. From a regional development perspective, the Asia-Pacific region, especially China, has significantly enhanced its global market supply capacity thanks to its strong manufacturing base and robust domestic demand.
