Abstracts

The global Press Fit Connector market size is expected to reach \$ 13550 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

This report studies the Press Fit Connector market. By their name, press-fit connectors are pressed through properly dimensioned plated-through holes on a printed circuit board (PCB). This technology is an alternative to the soldering method and offers a number of advantages over its more traditional counterpart. With press-fit connectors, you can eliminate a number of negative aspects that come along with soldering: thermal stress on the PCB, cold solder joints, shorts (caused by solder bridging), and the elimination of lead-free solder, which introduces its own set of problems. Press-fit connectors are also easily repaired, more environmentally friendly, and cost effective.

The leading manufacturers of press-fit connectors include TE, Samtec, Amphenol, Molex, JST, etc., with the top three accounting for about 50% of the market.

Europe is the main market, accounting for about 35%, followed by North America at about 30%.

This report studies the global Press Fit Connector production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Press Fit Connector and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
