According to our (Global Info Research) latest study, the global Press Fit Connector market size was valued at USD 8538 million in 2023 and is forecast to a readjusted size of USD 11770 million by 2030 with a CAGR of 4.7% during review period.

This report studies the Press Fit Connector market. By their name, press-fit connectors are pressed through properly dimensioned plated-through holes on a printed circuit board (PCB). This technology is an alternative to the soldering method and offers a number of advantages over its more traditional counterpart. With press-fit connectors, you can eliminate a number of negative aspects that come along with soldering: thermal stress on the PCB, cold solder joints, shorts (caused by solder bridging), and the elimination of lead-free solder, which introduces its own set of problems. Press-fit connectors are also easily repaired, more environmentally friendly, and cost effective.

The leading manufacturers of press-fit connectors include TE, Samtec, Amphenol, Molex, JST, etc., with the top three accounting for about 50% of the market.

Europe is the main market, accounting for about 35%, followed by North America at about 30%.
