According to our (Global Info Research) latest study, the global Press Fit Machines market size was valued at USD 96 million in 2023 and is forecast to a readjusted size of USD 124.5 million by 2030 with a CAGR of 3.8% during review period.

Press-fit technology is that inserting flexible or rigid pins of connectors into plated through holes (PTHs) of printed circuit board (PCB) without soldering. It is reliable and easy to operate. The basic requirement is that the diameter of press-fit zone must be greater than the diameter of PTH. During the press-fit process, there is deformation of the pin. Thus, the pin slides into the hole and is connected with the PTH tightly.

Press Fit machines bring enhanced levels of control and force measurement that improve efficiency and yields in the manufacturing and assembly of printed circuit boards.

Global Press Fit Machines key players include TE Connectivity, Eberhard, Lazpiur, UMG Technologies, SYNEO, etc. Global top five manufacturers hold a share over 60%.

Europe is the largest market, with a share about 40%, followed by North America and China, both have a share over 20%.

In terms of product, automatic is the largest segment, with a share over 50%. And in terms of application, the largest application is Automotive, followed by Consumer Electronics and Telecommunication.

The Global Info Research report includes an overview of the development of the Press
