Abstracts

The global Press-fit Pin market size is expected to reach \$ 2658 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

A press-fit pin is a mechanical fastener typically made of metal, designed with a specific diameter and length. It is intended to be inserted into a corresponding hole in a mating component by applying pressure, creating a tight interference fit. This interference provides a secure connection that can withstand axial and radial forces, often used in various industries like electronics, automotive, and manufacturing to assemble parts precisely and reliably without the need for additional fastening elements like screws or bolts.

In 2025, global Press-fit Pin production reached approximately 70,328 million units, with an average global market price of around US\$ 28.3 per K unit.

The press - fit pin industry is currently experiencing several notable trends.

Technologically, with the continuous miniaturization of electronic devices, there is an increasing demand for high - density and small - size press - fit pins. For example, in the automotive electronics sector, the development of advanced driver - assistance systems (ADAS) and in - car infotainment systems requires a large number of high - performance press - fit pins to achieve reliable electrical connections in a limited space. At the same time, the demand for high - speed and high - frequency signal transmission is also on the rise. Press - fit pins need to have better signal integrity and impedance matching characteristics to meet the requirements of 5G communication, automotive Ethernet, and other high - speed data transmission applications. In terms of the market, the scale of the press - fit pin market is expanding. Driven by the development of industries such as automotive, 5G communication, and consumer electronics, the

demand for press - fit pins is increasing. In the automotive industry alone, due to the trend of electrification and intelligence, each vehicle requires a large number of press - fit pins, bringing huge market opportunities to the industry.
