## Abstracts

According to our (Global Info Research) latest study, the global Pressure Sensitive Cold Laminating Film market size was valued at US\$ 296 million in 2024 and is forecast to a readjusted size of USD 426 million by 2031 with a CAGR of 5.4% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Cold laminating film is a type of protective film used to cover and protect printed materials without the need for heat. Unlike hot laminating films, which require heat to activate the adhesive, cold laminating films use a pressure-sensitive adhesive that bonds when pressure is applied. This makes them ideal for materials that could be damaged by heat, such as certain types of paper, inkjet prints, and delicate substrates.
