## Abstracts

The global Primary Flight Display (PFD) market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

A primary flight display or PFD is a modern aircraft instrument dedicated to flight information. Much like multi-function displays, primary flight displays are built around a Liquid-crystal display or CRT display device. Representations of older six pack or 'steam gauge' instruments are combined on one compact display, simplifying pilot workflow and streamlining cockpit layouts.

This report studies the global Primary Flight Display (PFD) production, demand, key manufacturers, and key regions.
