A Print and Apply Labelling Machine(PALM) is a type of automatic labelling system that is used to apply labels to various product packages, containers, cartons, or products. The labelling machine is designed to print product information or barcode data onto self-adhesive labels and then apply them to the products. The machine comprises a printer mechanism, which prints the shipping or other product details, and an applicator mechanism that applies the label to the product. These machines can be integrated into the packaging line or production processes to automatically apply labels to products. Print and apply labelling machines are widely used across various industries, including food and beverage, pharmaceutical, and logistics, to improve productivity and efficiency in labelling and packaging operations.
