According to our (Global Info Research) latest study, the global Printed Fabric market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The global printed fabric market is mainly distributed in North America, Europe, the Asia-Pacific region and Latin America, with a market size of about 57 billion meters. From 2014 to 2018, the global output of printed fabrics has been increasing year by year, and the output in 2019 has declined slightly. In 2020, affected by the new crown epidemic, the output is expected to decline to about 46 billion meters, a year-on-year decrease of nearly 20%.

Currently, the world's top five textile digital inkjet printing markets are China, Italy, the United States, Turkey and India. According to relevant statistics, in 2018, the output of textile digital inkjet printing in Asia accounted for 39% of the global total. Among them, the output of China, India, and Pakistan ranked the top three. Asia has surpassed Europe to become the largest production place of digital inkjet printing, and China is the leader in the digital inkjet printing market. From 2014 to 2019, the output of printed fabrics in China remained at about 16 billion meters, and the market potential is huge.
