Abstracts

Printed sensors, a subset of printed electronics, are manufactured by using techniques like screen printing, flexography, gravure, and inkjet. Printed sensor technology makes sensing much easier and improves monitoring substantially, because it can be integrated into flexible substrates such as paper, plastic, and foil. These sensors can be woven into cloth to measure bodily functions, used to create human-centered interfaces, or can be directly attached to the skin for healthcare purposes.

Scope of the Report:

This report focuses on the Printed Sensor in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The smart packing application is expected to grow at a high CAGR during the forecast period. Printed sensors play a major role in the smart packaging application as they help the manufacturers to keep track of their inventories. They are also used to monitor temperature, humidity, and gas for sensitive products, especially food and beverages. Moreover, given the rise in the adoption of smart packaging across the globe to increase the visibility, hygiene, quality, and safety of the product, there is a demand for printed sensors.

Europe held the largest share of the printed market in 2017, while the market in Asia-Pacific is expected to grow at the highest rate during the forecast period. The high growth of the Asia-Pacific market is attributed to the presence of a number of leading consumer electronics manufacturers, rapid industrialization in the region, the growth in the production of commercial as well as non-commercial vehicles with driver assistance systems and touch infotainment systems, and the increasing number of patients of

lifestyle diseases such as diabetes.

The worldwide market for Printed Sensor is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
