A private domain integration solution is a platform that integrates multiple functions such as customer relationship management (CRM), marketing automation, data analytics, and social media management. It aims to help businesses efficiently manage and operate their private domain traffic. This type of solution facilitates deep interaction with customers across various digital channels (such as social media, e-commerce platforms, email, and SMS), enabling businesses to achieve precise user marketing, customer lifecycle management, and enhanced brand loyalty. Private domain integration solutions can be deployed in the cloud, offering flexible scalability, or on-premises to meet businesses' specific needs for data security and customization.

The downstream market for private domain integration solutions primarily targets businesses in retail, e-commerce, education, healthcare, food and beverage, and fast-moving consumer goods sectors that need to directly manage their own customer base. These clients deploy private domain integration platforms to achieve customer data collection, user tagging, precise marketing, community management, and membership management, thereby improving customer retention and repurchase rates. In terms of profitability, the gross profit margin for downstream system deployment, customized operations, and value-added services typically falls within the 30%-50% range, depending on the company size, degree of customization, and service depth. High-value-added strategic consulting and ongoing operational services can generate even

higher profits.

Private domain integrated solutions are becoming a key tool in the digital transformation of enterprises, especially in an increasingly competitive market environment. Such solutions can help enterprises build closer customer relationships and improve user stickiness. By integrating multi-channel customer data, enterprises can accurately identify user needs and implement personalized marketing strategies to maximize the commercial value of private domain traffic. With the growth of data privacy and consumer personalized needs, private domain integrated solutions are not only a tool for enterprises to enhance their competitiveness, but also an important trend in future marketing.
