Abstracts

According to our latest research, the global Private Domain Traffic Network Marketing Service market size will reach USD 4511 million in 2031, growing at a CAGR of 12.0% over the analysis period.

Private domain traffic network marketing services refer to a marketing service mode in which enterprises continuously operate and maintain user relationships through their own or controllable digital channels to achieve user retention, conversion and repurchase. Compared with 'public domain traffic' that relies on platform traffic, private domain traffic has the characteristics of repeated reach, low operating costs and strong user stickiness, and has become one of the important means of digital marketing for brands.
