## Abstracts

According to our (Global Info Research) latest study, the global Private Island Rental market size was valued at US\$ 4313 million in 2025 and is forecast to a readjusted size of US\$ 7042 million by 2032 with a CAGR of 7.2% during review period.

Private Island Rental refers to a luxury real estate & hospitality service where an individual, group, or company rents an entire privately owned island (including its villas, facilities, and services) for exclusive temporary use, typically for vacation, leisure, private events, or corporate retreats. It is one of the highest-end segments of the global luxury travel and vacation rental market.

The global private island rental market is a high-growth, ultra-premium niche within the luxury vacation rental sector, driven by enduring demand for privacy, exclusivity, and experiential travel. The market is characterized by a two-tier supply structure (ultra-luxury fully serviced islands vs. mid-tier self-catering options), regional concentration in the Caribbean and Indian Ocean, and accelerating adoption of dynamic pricing and sustainable operations.

The global private island rental market is a resilient, high-margin niche that benefits from enduring consumer demand for privacy and exclusivity. While challenges like regulation and climate change persist, opportunities in mid-tier expansion, workcations, and sustainable luxury will drive growth through 2032. Operators that balance service excellence, technological innovation, and environmental responsibility will capture the largest share of this expanding market.
