Abstracts

Privileged identity management (PIM) is the monitoring and protection of superuser accounts in an organization's IT environments.

Oversight is necessary so that the greater access abilities of super control accounts are not misused or abused. Unmanaged super user accounts can lead to loss or theft of sensitive corporate information, or malware that can compromise the network.

SCOPE OF THE REPORT:

This report studies the Privileged Identity Management market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Privileged Identity Management market by product type and applications/end industries.

North America is expected to have the largest market size and would dominate the privileged identity management market during the forecast period. Increasing penetration of the Internet and smart & connected devices has led to growing security needs.
