According to our (Global Info Research) latest study, the global Process Gas Centrifugal Compressors market size was valued at USD 3411 million in 2023 and is forecast to a readjusted size of USD 4284.6 million by 2030 with a CAGR of 3.3% during review period.

This report mainly focus on Centrifugal Compressors used for process gas market. Process Gas Compressor is mechanical device that increases the pressure of process gas such as argon, ethylene, fluorine, helium, hydrogen, oxygen, neon, silane, TFE, xenon and other gases, by reducing its volume. This report does not cover compressors for air and nitrogen. Centrifugal compressors, sometimes called radial compressors, are a sub-class of dynamic axisymmetric work-absorbing turbomachinery.

The Asia-Pacific has shown the fastest growth rate corresponding to the industrial and consumer market growth of India and China and also the gas demand growth from developed countries such as Australia. Recent developments in the end-user industry are expected to be a major driver for the process gas compressor market's growth in the region. End users like oil and gas, power generation, and manufacturing industry, all are anticipated to witness significant growth which will further aid the growth of the process gas compressors. Moreover, supporting government initiatives and increasing investments in the region also foreshadow the growth of the manufacturing industry, especially in China and India. For instance, in India, the Make In India and Production Linked Incentive (PLI) schemes gave the manufacturing industry a substantial boost in various verticals. In addition, according to the India Brand Equity Foundation, by 2025, the Indian manufacturing sector has the potential to reach USD 1 trillion.
