## Abstracts

According to our (Global Info Research) latest study, the global Product Design and Development Services market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Product development services design, test, support, document, and certify industrial, commercial and consumer products. They differ from dedicated industrial design services, which specialize in the aesthetics and usability of mass-produced parts, components, machines and equipment. Industrial designers consider their discipline to be an applied art, and implement design solutions that accounts for factors such as brand development, ergonomics, engineering, form, marketing, and sales. By contrast, product development services integrate the work of a design team with that of a user group, industrial and mechanical designers, testing and integration group, and manufacturing team. Industrial product developers may also provide project management services for companies in both industrial and consumer-oriented industries.
