Abstracts

The global Product Traceability System (PTS) market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Product Traceability System (PTS) is not to supervise enterprises but to help enterprises establish brand images and enhance social effects and economic benefits. Full-process tracking management not only strengthens enterprise quality management, reduces error correction costs, but also facilitates enterprises to collect product intelligence, understand consumer trends, and improve rapid response capabilities. In the field of process manufacturing, especially in the fields of food safety, pharmaceutical production, and some chemical product manufacturing, establishing a Product Traceability System (PTS) has become one of the important management methods for enterprises to survive. In discrete manufacturing companies, such as automobiles and electronic products, when quality problems occur, a traceability system can be established to quickly identify the relevant batches and the key to the quality problem, and recall the relevant batches of products. On the one hand, consumers' problems can be quickly dealt with. At the same time, recall losses are reduced.

Product Traceability System (PTS) is a production control system that can perform forward, reverse, and non-directional tracking of products, and is applicable to any product. Through the traceability system, the cycle management of goods from the procurement of raw materials and auxiliary materials, product production, warehousing, sales and service can be realized to achieve “ security can be warned, sources can be traced, flows can be tracked, information can be queried, responsibilities can be identified, Product recall ”function.

This report studies the global Product Traceability System (PTS) demand, key

companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Product Traceability System (PTS), and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Product Traceability System (PTS) that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Product Traceability System (PTS) total market, 2018-2029, (USD Million)

Global Product Traceability System (PTS) total market by region & country, CAGR, 2018-2029, (USD Million)

U.S. VS China: Product Traceability System (PTS) total market, key domestic companies and share, (USD Million)

Global Product Traceability System (PTS) revenue by player and market share 2018-2023, (USD Million)

Global Product Traceability System (PTS) total market by Type, CAGR, 2018-2029, (USD Million)

Global Product Traceability System (PTS) total market by Application, CAGR, 2018-2029, (USD Million).

This reports profiles major players in the global Product Traceability System (PTS) market based on the following parameters – company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include AKEAD, QDA SOLUTIONS, Qodenext, Env?ame, Doeet, Tecnipesa, Bionix Technologies, Blue Bite and DENSO, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Product Traceability System (PTS) market.

Key Questions Answered

1. How big is the global Product Traceability System (PTS) market?

2. What is the demand of the global Product Traceability System (PTS) market?

3. What is the year over year growth of the global Product Traceability System (PTS) market?

4. What is the total value of the global Product Traceability System (PTS) market?

5. Who are the major players in the global Product Traceability System (PTS) market?
