According to our (Global Info Research) latest study, the global Production Checkweighers market size was valued at US\$ 716 million in 2024 and is forecast to a readjusted size of USD 841 million by 2031 with a CAGR of 2.3% during review period.

A checkweigher is an automatic or manual machine for checking the weight of packaged commodities. It is normally found at the offgoing end of a production process and is used to ensure that the weight of a pack of the commodity is within specified limits. Any packs that are outside the tolerance are taken out of line automatically.

A checkweigher can weigh in excess of 500 items per minute (depending on carton size and accuracy requirements). Checkweighers can be used with metal detectors and X-ray machines to enable other attributes of the pack to be checked and acted upon accordingly.

Market competition is not intense.
