Abstracts

Projection screens are one of the most commonly used products in projector peripherals. If the projection screen is properly matched with the projector, you can get a high-quality projection effect. Projection curtains can be generally divided into two types: reflective and transmissive in terms of function; reflective type is used for front projection, and transmissive type is used for rear projection; front projection screens are further divided into flat screens and arc screens; Glass curtain, metal curtain, embossed plastic curtain, etc. In general, the picture effect of the hard screen is better than that of the soft screen.
