Abstracts

Protective coating resins are predominantly used to achieve corrosion control, temperature resistance, chemical resistance, hardness, and toughness in harsh environments. As such, protective coatings are applied to a surface to ensure protection from external environment, which can otherwise damage the function or integrity of an item or part. Protective coatings find applications in consumer products as well as in the heavy machinery, marine, automotive, and oil and gas industries.

SCOPE OF THE REPORT:

This report focuses on the Protective Coating Resins in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa.
