Abstracts

A device that senses the quantity of current flowing in the supply lines before entering the power system of the equipment or motor can prevent the motor from damage. A relay is one such electromechanical device that is actuated by electrical current. In a relay, the current flowing in one circuit causes the opening and closing of another circuit. Due to the simplicity, long life, and proven reliability, relays find extensive use in many applications, including digital computers, automation systems, and telephone exchanges.

Scope of the Report:

This report focuses on the Protective Relay in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Asia-Pacific is estimated to hold the largest market share, followed by North America and Europe. In terms of individual countries, the market is dominated by China. This can be attributed to the extensive electrical infrastructure upgradation and new transmission & distribution lines being installed in the country. China held the largest share of the global protective relay market in 2017. Rapid economic growth in BRICS nations is expected to drive the protective relay market in these nations. Protective relays will likely be used extensively in the new electrical transmission & distribution networks of BRICS countries.

The worldwide market for Protective Relay is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
