Protective sleeving is a type of protective covering used to shield cables, wires, and hoses from damage caused by abrasion, chemical exposure, heat, and other environmental factors. Made from materials such as plastic, rubber, or fabric, protective sleeving provides a layer of defense that enhances the durability and longevity of the underlying components. It is commonly used in various industries, including automotive, aerospace, and electronics, to ensure the safe and reliable operation of critical systems. By preventing physical wear and exposure to harmful substances, protective sleeving helps maintain the integrity of cables and hoses, reduces maintenance costs, and improves overall safety.
