Abstracts

Multiplex protein assays allow multiple targets quantification in a single sample, a bit like performing up to 40 different ELISAs in one go. Outsourcing Multiplex Protein Quantification projects to experts may work out more cost effective and time saving. It saves you the hassle of setting up a new technology in your lab, and you can rely on people with years of expertise in the technology to generate quality data on the very first run. Should you wish to set it up in your own lab, some technologies are easily adaptable if you have access to the equipment.
