Pterocarpus Marsupium Bark Extract generally refers to a botanical extract derived from the bark of Pterocarpus marsupium. It is a natural botanical active ingredient used in cosmetics and nutritional health products. The product mainly contains active components such as pterostilbene, polyphenol, flavonoid, and saponin, and is characterized by antioxidant, anti-glycation, soothing and repairing, skin tone conditioning, and botanical active protection properties. Compared with ordinary botanical powder or crude extract, Pterocarpus Marsupium Bark Extract places greater emphasis on active ingredient enrichment, efficacy stability, and formulation compatibility.

The upstream inputs of Pterocarpus Marsupium Bark Extract mainly include Pterocarpus marsupium bark raw material, extraction solvents such as ethanol or water, purification media, carrier materials, stabilizers, and packaging materials. In the midstream, the product is usually manufactured into powder, liquid, or highly standardized active ingredient products through raw material selection, crushing, solvent extraction, filtration, concentration, purification, drying, and standardized blending processes. Downstream applications are mainly concentrated in functional

skincare, nutritional health products, botanical medicine research, and natural active ingredient development. Among these, the cosmetics segment focuses more on antioxidant, anti-glycation, skin brightening, spot reduction, soothing, and repairing effects, while the nutritional health segment pays more attention to the functional value of botanical polyphenol components.
