## Abstracts

The global PTFE Balls market size is expected to reach \$ 293 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Global sales of PTFE Balls was about 12540 tons in 2025 with average price of 16920 USD/ton. The average gross margin of the industry is between 15%-20%.

PTFE Balls are spherical components made from polytetrafluoroethylene (PTFE, ?Teflon?), typically produced by molding and then finishing (e.g., precision grinding) to meet diameter/sphericity requirements. They are valued for their very low friction / non-stick surface, excellent chemical resistance, and wide service temperature range, so they're commonly used in ball/check/relief/float valves, pumps, seals, and light-load bearing or rolling applications.

This report studies the global PTFE Balls production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for PTFE Balls and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of PTFE Balls that contribute to its increasing demand across many markets.
