## Abstracts

According to our (Global Info Research) latest study, the global PTFE Dispersion Micropowder market size was valued at USD 225.2 million in 2023 and is forecast to a readjusted size of USD 237.1 million by 2030 with a CAGR of 0.7% during review period.

Polytetrafluoroethylene (PTFE) micro powder is white fine powder. It not only basically maintains the excellent properties of PTFE, but also has many unique properties, such as high crystallinity, good dispersibility, easy to be mixed with other materials evenly. PTFE micropowders can be compounded in rubber, plastics and disbursed in liquid. They are used in a broad range of applications such as inks, coatings, lubricants, and paints. Because of their versatility, PTFE micropowders continue to gain preference as an additive in many applications, as indicated by its steady demand. Micronized polytetrafluoroethylene (PTFE) has gained popularity as a wonder element in diverse industrial applications such as inks, coatings, lubricants, and paints, due to its versatile operational characteristics. Despite being a niche market, the micronized PTFE landscape is expanding rapidly, as its demand has been steadily increasing in a wide range of end-use industries after its accidental discovery. With its high surface lubricity and anti-blocking properties, micronized PTFE is being accepted in industries such as food, textiles, pharmaceuticals, and electronics. However, the recent surge in the growth of the automotive industry has provided an impetus to the demand for micronized PTFE in anti-corrosion paints and coatings, in modern automobiles. This trend is expected to only grow stronger with the rate at which global automotive production is increasing. This is likely to create lucrative opportunities and scope for innovation for micronized PTFE manufacturers in the coming years. In this report, we research the Micronized PTFE with average particle size around 1~100 um in diameter.

The key players of PTFE Dispersion Micropowder include Shamrock Technologies, Solvay and Daikin, etc. The top three players hold a share over 58%. Asia-Pacific is the largest market, has a share about 53%. In terms of product type, Recycled PTFE is the largest segment, occupied for a share of about 94%, and for application ,it apply to Engineering Plastics, which has a share about 53%.
