## Abstracts

The global PTZ Time Lapse Cameras market size is expected to reach \$ 105.3 million by 2029, rising at a market growth of 6.7% CAGR during the forecast period (2023-2029).

Time Lapse Camera is used for time-lapse shooting which is a shooting technique that compresses time. It shoots a set of photos or videos, and later compresses the process in minutes, hours, or even days and years in a short period of time by video. In a time-lapse video, the process of slowly changing objects or scenes is compressed for a short period of time, presenting a strange and fascinating sight that is usually undetectable by the naked eye.
