Abstracts

Polyurethane is thermosetting polymer which could be molded into any shape which in turn helps in creating wide varieties of properties as per the desired application.

Polyurethane sealants provide strong bonding which reduces need for holding and clamping materials. This proves to be a cost effective method which also increase the construction flexibility and increases production capacity.

Scope of the Report:

This report focuses on the PU Sealants in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The Asia-Pacific polyurethane sealants market is projected to grow at the highest rate, in terms of value and volume, from 2018 to 2023. Polyurethane sealant manufacturers are targeting this region, as it has the largest construction industry, accounting for approximately 45% of the global construction spending.

The China polyurethane sealants market has grown rapidly and is projected to witness high growth in the future due to continuous shift of the global polyurethane sealants production facilities in the country. Countries, such as India, Thailand, and Indonesia are investing heavily in various end-use industries, which is likely to influence the growth of the polyurethane sealants market in these countries.

The worldwide market for PU Sealants is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
