According to our (Global Info Research) latest study, the global Public Safety LTE market size was valued at USD 981.8 million in 2023 and is forecast to a readjusted size of USD 2452.6 million by 2030 with a CAGR of 14.0% during review period.

LTE is widely used by enterprises as well as public safety agencies for communicating with convenience. Due to the bandwidth limitations of traditional voice-centric LMR network systems, public safety agencies are interested in leveraging commercial cellular network technology to support the growing requirement of broadband applications. Considering its booming network, spectrum flexibility, and performance metrics, LTE has emerged as the leading entrant for public safety mobile broadband networks.

The market for hybrid LTE is expected to grow at the highest rate during the forecast period. Higher reliability than commercial LTE and lower cost as compared to private LTE are the reasons that are expected to drive the market for hybrid LTE between 2018 and 2023.
