Abstracts

The global Pulp Drying Equipment market size is expected to reach \$ 157 million by 2032, rising at a market growth of 4.0% CAGR during the forecast period (2026-2032).

Pulp drying equipment refers to industrial machinery and integrated systems used to remove moisture from wet pulp and convert it into stable, transportable, and storable forms, such as pulp sheets, rolls, flakes, or loose fibers. A typical pulp drying line may include pulp forming, pressing, airborne or cylinder drying, cooling, sheet cutting, baling, and process control units. Depending on the pulp type and final product requirements, the equipment may adopt airborne drying, flash drying, cylinder drying, belt drying, or other thermal drying technologies and is widely used in the production of market pulp, dissolving pulp, fluff pulp, mechanical pulp, and recycled pulp. In 2025, global Pulp Drying Equipment production reached approximately 2558 units, with an average global market price of around 43 k USD/unit. The production capacity for Pulp Drying Equipment in 2025 was approximately 3000 units. The typical gross profit margin for Pulp Drying Equipment between 20% and 40%.

The global pulp drying equipment market is primarily driven by capacity expansion and modernization in the market pulp, packaging paper, hygiene products, and regenerated cellulose industries. Demand is increasingly concentrated on large-capacity, energy-efficient, highly automated, and digitally controlled drying lines that can reduce steam consumption, improve moisture uniformity, and enhance production reliability. New pulp projects in Asia, South America, and other forest-resource-rich regions are creating equipment demand, while mature markets mainly generate opportunities from dryer rebuilds, heat-recovery upgrades, emission reduction, and process optimization. Due to high capital requirements, complex system integration, and strong engineering barriers, the market remains relatively concentrated among a limited number of global full-line

suppliers and specialized drying technology companies.
