According to our (Global Info Research) latest study, the global Pure Nickel Strips market size was valued at US\$ 1183 million in 2025 and is forecast to a readjusted size of US\$ 1760 million by 2032 with a CAGR of 5.8% during review period.

Pure nickel strip is a high-purity nickel metal product, made into thin, flat strips for applications requiring corrosion resistance, electrical conductivity, and high-temperature stability. It is widely used in batteries, electronic components, chemical equipment, and aerospace. The pure nickel strip industry chain includes upstream nickel smelting and refining, alloying, and surface treatment; midstream manufacturing encompasses rolling, annealing, slitting, and precision cutting; and downstream applications include battery production, electronic components, chemical equipment, and aerospace manufacturing. Supporting services include quality inspection, coating treatment, packaging, and logistics. In 2025, global pure nickel strip production was approximately 32,900 tons, with a global average market price of approximately US\$35 per kilogram. The gross profit margin of major companies in the industry ranged from 20% to 40%. In 2025, global pure nickel strip production capacity was approximately 41,100 tons.

The Pure Nickel Strip market is driven by increasing demand in the battery and electronics industries, especially for electric vehicles and renewable energy storage. Growth is supported by advances in nickel refining, precision rolling, and surface treatment technologies. Manufacturers focus on material purity, consistency, and supply chain reliability to meet industrial and aerospace standards.
