According to our (Global Info Research) latest study, the global Push Button Pendant Control Station market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Push button pendant control stations are a series of simple switches that control much larger electrical loads through various means. This causes the machine to move to and from the desired point. A pendant control hangs down from the hoist or off of a separate festoon track and allows the operator to control the crane and the load as it moves down the runway. A handheld controller with push buttons is directly wired into the hoist or a separate festoon track and hangs down to be used by the operator.
