Abstracts

According to our (Global Info Research) latest study, the global Push Camera market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Push Cameras are lower-end inspection cameras that get their name from how they are inserted into the inspection area. Literally pushed or “fed” into the inspection area, these cameras will not articulate and will often lack basic features that are native to modern-day Video Borescopes and Videoscopes. Like Drain Cameras, Pipe Cameras, Sewer Cameras, and Borehole Cameras, Push Cameras are reserved for applications where corners, turns, forks, and FOD (Foreign Object Debris) are not involved. The downside to a Push Camera and other non-articulating inspection cameras is the loss of control. Once the Distal Tip or “head” of the unit is past the insertion point, very little can be done to manipulate or steer the direction of the camera.

The Global Info Research report includes an overview of the development of the Push Camera industry chain, the market status of Municipal (Line Capacity 0-100 mm, Line Capacity 100-200 mm), Industrial (Line Capacity 0-100 mm, Line Capacity 100-200 mm), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Push Camera.
