Abstracts

The global PV Junction Box market size is expected to reach \$ 2404 million by 2032, rising at a market growth of 6.8% CAGR during the forecast period (2026-2032).

A photovoltaic (PV) junction box is an important part of the solar panels. The junction box is an enclosure on the module where the PV strings are electrically connected. Junction boxes are installed by photovoltaic (PV) manufacturers directly on to the back of every PV panel and serve as the interface between the conductors ribbons on the panel and the DC input and output cables.

Global PV Junction Box key players include ZJRH, Jinko, Tonglin, GZX, TE Connectivity, etc. Global top five manufacturers hold a share about 25%. China is the largest market, with a share about 50%, followed by North America and Europe, both with a share about 15 percent. In terms of product, Non-Potting PV Junction Box is the largest segment, with a share about 50%. And in terms of application, the largest application is Utility, followed by Commercial, and Residential.
