Abstracts

According to our (Global Info Research) latest study, the global PV POE (Polyolefin Elastomers) market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Compared with the standard ethylene vinyl acetate (EVA) in the current photovoltaic industry, POE products deliver outstanding stability, moisture resistance and performance in various rooftop and facade applications. Although the POE processing threshold is high and the market share is small, under the background of continuous technological breakthroughs, photovoltaic POE has a good market prospect.

Thermoplastic Polyolefin Elastomers (or POEs, TPOs) mainly refers to thermoplastic elastomers formed by blending rubber and polyolefin. The main application of Polyolefin Elastomers in the photovoltaic industry is encapsulant solar films and sealants.
