## Abstracts

The global PV POE (Polyolefin Elastomers) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Compared with the standard ethylene vinyl acetate (EVA) in the current photovoltaic industry, POE products deliver outstanding stability, moisture resistance and performance in various rooftop and facade applications. Although the POE processing threshold is high and the market share is small, under the background of continuous technological breakthroughs, photovoltaic POE has a good market prospect.

Thermoplastic Polyolefin Elastomers (or POEs, TPOs) mainly refers to thermoplastic elastomers formed by blending rubber and polyolefin. The main application of Polyolefin Elastomers in the photovoltaic industry is encapsulant solar films and sealants.
