PVC Corrosion Protection Tape is a multi-layer, pressure-sensitive adhesive system designed for long-term protection of metallic substrates against corrosive elements in demanding environments. The tape construction typically combines a durable PVC film backing with a specially formulated adhesive system that provides tenacious bonding while accommodating substrate movement. Its inherent properties include excellent resistance to moisture penetration, chemical attack from soil electrolytes, and UV degradation, forming a continuous barrier that effectively isolates the protected surface from corrosive agents. The material composition is engineered to maintain flexibility and adhesion integrity across a wide temperature range, ensuring reliable performance in both buried and exposed service conditions.
